

93 Series

WALL BOX TIME SWITCH

The MARKTIME® 93 Series Wall Box Time Switch is a complete line of spring wound, manually set time switches for the control of electrical current. Interchangeable with standard toggle switches to turn circuits either “off” or “on” at the end of a pre-set time period, the 93 Series is ideally suited for either new installations or retrofit projects. Standard colors are ivory and white.

APPLICATIONS

The MARKTIME® 93 Series Wall Box line has been engineered to provide the greatest level of versatility for applications that demand accurate, dependable time control. Typical applications include: controlling electrical circuits for lighting, heating, ventilating and air conditioning equipment, attic fans, heat lamps, whirlpools and saunas, as well as in conjunction with HVAC systems as a thermostat bypass.

FEATURES

- Broadest time ranges available from 15 minutes to 12 hours
- Fits into standard NEMA 3” single gang wall box
- Manual override hold option available
- 20 amps at 125 VAC handles heavy “motor” loads
- Easy to use rotary knob
- Available to either turn “off” or “on” circuits
- Blends with contemporary wall plates and color schemes
- SPST, SPDT, or DPST wiring available
- Can be used with standard single or multi gang decorator wall plates
- Purchase package includes both white and ivory knobs and decorator plates
- Combined N.O. and N.C. switching configuration
- Operating Temperature: -40°F to 120°F

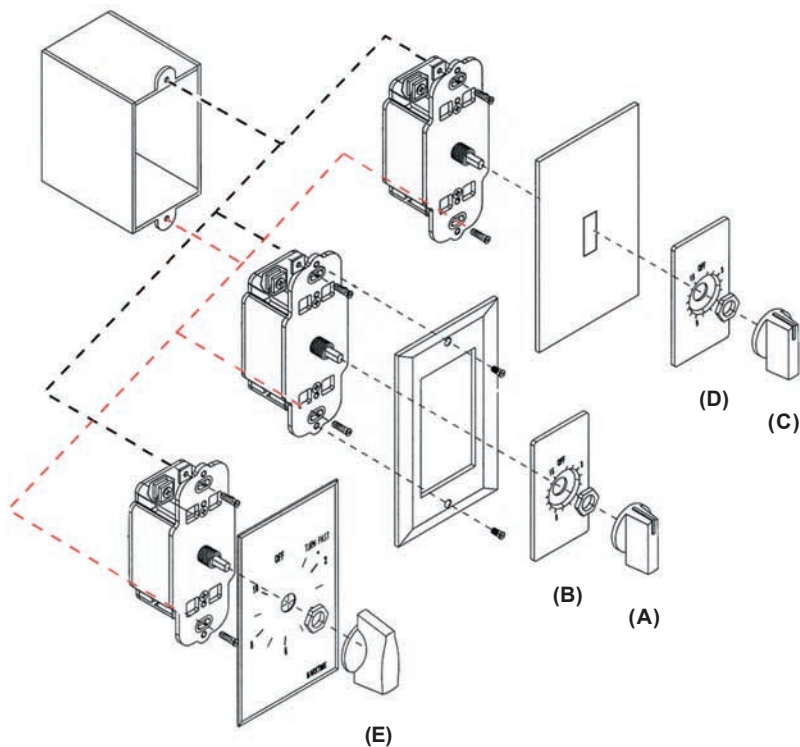

ORDERING PART NO.	TIME PERIOD
93501	15 MIN
93511	15 MIN (H)*
93502	30 MIN
93512	30 MIN (H)*
93503	60 MIN
93513	60 MIN (H)*
